Assemblyman Judson Lawson, George W. Stokes, Orlando Smith, John W. Stevens, Henry C. Robin mittee of cition and A. W. Lightbourn, a zens, are preparing to make a thorough exam of the charge made by Matthew Jephson O'Rourke regarding the fraudulent issues bonds aggregating \$100,000,000. Ex-Judge William mmittee's counsel, was not in the city yesterday. He is taking a little rest at Vineyard Haven preparatory to entering upon the labor-lous work which he has undertaken. Mr. Arnoux has been in consultation with Controller Fitch and has made arrangements for examining thoroughly and completely all the records of the finance partment having any connection with this stupenundertaking, as the evidences of these duplicate issues of bonds, if they exist, must run through the

THE BOARD WANTS ITS MONEY. COMMISSIONERS OF EDUCATION OBJECT TO THE PAYMENTS MADE TO TWO ASSISTANTS

OF THE CORPORATION COUNSEL-A QUESTION OF \$5,700.

There may be work for the committee of citizens the investigating the finances of New-York in the rela-

tions between the Board of Education and the Controller's office. An "Irregularity" in these relations was pointed out the other day by the Board of Education. The amount in this instance is not large, the total being not quite \$5,000, but it is an instance in which money has been paid by two Controllers directly in violation of the law.

A curious part of the case is that while mether Controller Fitch nor Corporation Counsel Clark, whose offices are involved in this "irregularity," is responsible for it, both have been engaged in a controversy with the Board of Education for a year or more, endeavoring to cover up the matter. The Board of Education protested against the transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start as illegal, and a few transaction from the start for the start in which traits to the strick the thether that the days ago it unanimously anopted a report "showing

Upon inquiry at the Board of Education yesterday the following details relating to certain payments made by the Controller to Arthur Berry, amounting to \$5,200, and to Rollin M. Morgan, \$500, learned. The money was paid them for services as "special counsel" in the examination of property for condemnation as school sites. The Board of Education had its own counsel at this time, but it sthat the one detailed should have had experience Williams will stog, and Messrs, Jones and Sloan will was said that a place was made for these "special counsel" in the Corporation Counsel's office, and the Board of Education was charged for their 'special services." The violation of the law appears in the fact that the proceeds of the schoolpears in the fact that the payments were made by the Controller, can only be used "for liabilities incurred by the Board of Education the acquiring schoolbouse sites"; and the payments cannot be made "except on the requisition of the Board

acquiring schoolhouse sites"; and the payments cannot be made "except on the requisition of the Board of Education."

In the first place, the Corporation Counsel's office can only charge for its work on the account of school sites, the expenses "of searches, commissioners' fees, advertising, etc." The Corporation Counsel has not the authority to pay any of his assistants from this fund for their services, as such services are part of the work of the Corporation Counsel's office.

The Controller can in no instance make any payment from these bonds without violation of the law, except on "the requisition of the Board of Education." There never was any requisition in either of these payments, and they had already been made by Controller Myers when the attention of the Board of Education was ealled to the fact.

The payments to Arthur Berry were made on May 6, 1890, and on April 22, 1890, and that to Rollin M. Morgan on May 12, 1881. The Board of Education has never recognized the payments, and the amounts still stand to its credit in its own books. But in the books of the Finance Department the board is charged with those amounts, which it never authorized, and which it still refuses to recognize and diciares illegal.

By a special resolution last spring the Committee on Bylaws of the Board of Education was requested to make a full and thorough investigation of this report contains the details of the entire matter, and sustains the previous position of the Board. This report contains the details of the entire matter, and sustains the previous position of the Board of Education, and that the duties performed by Mr. Berry and Mr. Morgan were the duties of the office in which they were employed. The resolutions read as follows:

"Resolved, That in the opinion of this board the payment of the said several sums made to Messrs. Berry and Morgan are unauthorized and contrary to the statutes in such cases made and provided.

"Resolved, That in the opinion of this board that have been applied to the payment of the alleged

for the amount of said payment be vacated and DISINFECT THESE SCHEMES! cancelled."

The city may have to submit to this loss on payments which never should have been made. The board is determined to fix the responsibility for the payments.

But there never will be a Legislature with courage enough to pass the measure; nor a navy with capacity enough to effect the transportation; nor an expert in the analysis of
